

TCS B.Tech Placement-Prep Brief (2025-2026)

Overview

Tata Consultancy Services (TCS) is one of the largest IT service providers in the world and a major mass recruiter for B.Tech students in India. For the 2025-2026 batch, TCS conducts the National Qualifier Test (NQT) as the primary gateway for hiring across various roles including Ninja, Digital, and Prime.

Hiring Process

The TCS hiring process typically consists of two to three rounds:

1. **TCS NQT (Written Test):** An online assessment divided into Foundation Section (Traits, Numerical, Verbal, Reasoning) and Advanced Section (Advanced Quant, Reasoning, Coding). The performance determines the role offered.
2. **Technical Interview:** Evaluates the candidate's understanding of core computer science subjects (DBMS, OOPs, OS, CN), coding skills, and final year projects.
3. **HR/Managerial Interview:** Focuses on behavioral questions, situational judgment, and willingness to relocate or work across technologies.

Technical Stack

TCS hires generalists but expects a strong foundation in modern tech:

- **Languages:** Java, Python, C++, C#
- **Web Technologies:** HTML, CSS, JavaScript, React, Angular
- **Cloud & Databases:** SQL, basic understanding of AWS/Azure, MongoDB
- **Other:** Good grasp of Data Structures and Algorithms (DSA)

Recent News

- **Hiring Numbers:** TCS continues to be a top recruiter, aiming to hire approximately 40,000 freshers from the 2025 batch. (Source: News18, Economic Times)
- **AI Focus:** TCS is heavily investing in Generative AI, training a vast portion of its workforce in AI skills. Candidates with GenAI awareness have an edge.
- **Return to Office:** TCS has mandated a full return to the office (5 days a week) and linked variable pay to office attendance.

Eligibility

- **Academic Criteria:** Minimum 60% or 6.0 CGPA throughout academics (Class X, XII, B.Tech).
- **Branches:** All B.Tech/B.E. branches are generally eligible for the standard IT roles.
- **Backlogs:** Maximum of 1 active backlog is allowed at the time of appearing for the exam, which must be cleared before joining.
- **Package Range:**
 - TCS Ninja: ~₹3.36 LPA
 - TCS Digital: ~₹7.0 LPA
 - TCS Prime: ~₹9.0 LPA - ₹11.5 LPA

Prep Tips

1. **Master the TCS NQT Pattern:** Practice aptitude and reasoning questions specifically tailored to the TCS NQT pattern. Speed and accuracy in the Foundation section are crucial.
2. **Solidify Core CS Concepts:** Ensure you are thorough with Object-Oriented Programming (OOP), Database Management Systems (DBMS), and Operating Systems (OS).
3. **Practice Coding in C/C++/Java/Python:** Focus on competitive programming questions involving arrays, strings, and basic data structures. Be prepared to explain your logic clearly.
4. **Prepare Your Resume/Projects:** Be ready to discuss every detail of your final year project. Emphasize your contribution and the technologies used.
5. **Stay Updated on Tech Trends:** Have a basic understanding of Generative AI, Cloud Computing, and recent tech developments, as TCS values adaptable learners.
