

Placement-Cell AI Use Policy

1. AI-Use Scenarios & EU AI Act Risk Tiering

#	Scenario	Tier	Reasoning
1	AI resume editing	Limited	Allowed with disclosure to recruiters that AI was used. Student's substance is theirs; the polish is shared.
2	AI mock interviews	Minimal	Free use. Practice tool; no recruiter is harmed.
3	AI-written essays for application forms	High-risk	Allowed only with mentor review + student declaration. The application is graded on the student's voice.
4	AI-coded GitHub portfolio projects	High-risk	Allowed with mandatory oral defence. Student must walk through every accepted line.
5	AI in graded internal assignments	Limited	Allowed with declaration for assignments testing application; Unacceptable if testing pure recall ability.
6	AI-generated CGPA on resume	Unacceptable	Falsification of academic record. Banned outright.
7	AI-cloned voice for video interview	Unacceptable	Identity fabrication. Banned outright.
8	AI for skills self-assessment	Minimal	Free use. Self-reflection tool.

2. Permitted Uses

1. AI **may** be used to: **rewrite resume bullets** for clarity and grammar.
2. AI **may** be used to: **simulate mock interviews** for personal practice.
3. AI **may** be used to: **explain technical concepts** (e.g., DSA, OS topics) in study mode.
4. AI **may** be used to: **generate placement-prep study schedules** from a syllabus.
5. AI **may** be used to: **produce one-page company-prep briefs** (when verified against the company website).
6. AI **may** be used to: **review and suggest improvements to student-written code** (with subsequent oral defence).

3. Prohibited Uses

1. AI **may NOT** be used to: **fabricate projects, internships, or experience** that the student did not actually complete.
■ *Detection method: Mentor oral defence — the student must explain technical decisions in projects on their resume, with code walkthrough.*
2. AI **may NOT** be used to: **clone the student's voice** for asynchronous video interviews.
■ *Detection method: Verify with recruiter that pre-recorded interviews include a voice continuity check (recruiters increasingly require live segments).*
3. AI **may NOT** be used to: **generate or alter academic records** (CGPA, marks, transcripts).
■ *Detection method: Cross-reference all CGPA/marks claims with the college academic portal.*
4. AI **may NOT** be used to: **write essays where the student's voice is the assessment criterion** (SOP, motivation letters for direct hires).
■ *Detection method: Mentor reviews 2–3 historical writing samples and compares voice consistency.*

4. Enforcement

The placement cell will conduct **random oral defences** on portfolio projects (sample 20% of placed students). Any unverifiable AI use that violates Prohibited Uses results in: **first violation** — written warning + portfolio re-defence within 7 days; **second violation** — placement support withdrawn for the current cycle. The placement cell acknowledges that **not all violations are detectable**; the policy relies in part on student integrity and the broader career consequences of misrepresentation.
